

Supplemental Table 14. The top cited article by year from 2010 to 2019 for brachial plexus injury

Year	Discipline	Top cited article	No. of citations
2019	Neurosurgery	Timing of surgery in traumatic brachial plexus injury: a systematic review [41]	8
2018	Plastic surgery	Comparison of surgical strategies between proximal nerve graft and/or nerve transfer and distal nerve transfer based on functional restoration of elbow flexion: a retrospective review of 147 patients [42]	10
2017	Neurosurgery	Current concepts in plasticity and nerve transfers: relationship between surgical techniques and outcomes [43]	21
2016	Obstetrics and gynecology	Prevention of brachial plexus injury-12 years of shoulder dystocia training: an interrupted time-series study [44]	48
2015	Plastic surgery	Bionic reconstruction to restore hand function after brachial plexus injury: a case series of three patients [45]	56
2014	Obstetrics and gynecology	Neonatal brachial plexus palsy: incidence, prevalence, and temporal trends [46]	45
2013	Biology	Motor recovery and synaptic preservation after ventral root avulsion and repair with a fibrin sealant derived from snake venom [47]	40
2012	Neurosurgery	A systematic review of nerve transfer and nerve repair for the treatment of adult upper brachial plexus injury [48]	50
2011	Orthopedic surgery	Comparison of nerve transfers and nerve grafting for traumatic upper plexus palsy: a systematic review and analysis [49]	95
2010	Orthopedic surgery	Shoulder tendon transfer options for adult patients with brachial plexus injury [50]	43
